### *Swarovski and Briolette Necklaces*

*My briolette collection is vast. They are available in many stones, so choose the color size and even shape that you like best! I use a great deal of Swarovski crystals in all of these necklaces with the briolettes being the main focal part of the necklace. The Swarovski crystals give a gorgeous fire to complete the desired look.*

*Description of this ensemble to the right. Featured here is a purple quartz set which includes a bracelet and earrings. The varying shades of purple give this piece a lot more interest. The necklace measures 18 inches long and the briolettes are approximately 6 by 10mm each with a total of 24 in this piece.*

*Description of additional items below...The first is an adjustable piece from 15 to 16 inches in length. It consists of clear Swarovski crystals with 10 shimmering pink cubic zirconia briolettes (6x6mm in size). The second necklace is one of my favorites, iolite. It is somewhere in between sapphire and tanzanite in color. It is a color changing stone, so you will see gray to denim blue to an almost blue violet hue. I have several of these necklaces and loose stones. This one pictured features 18 briolettes that are 5x7mm and clear Swarovski crystals (4mm). It measures 19 1/2 inches long.*

*Description of additional items below...The first is watermelon tourmaline. It is highlighted with two shades of Swarovski crystals. The briolettes are approximately 5x7mm and there are 21 of them. The necklace measures 16 ½ inches long. The second necklace measures 18 inches long and features round and teardrop black onyx highlighted with Swarovski black diamond crystals. The third is 16 inches of gorgeous green quartz and Swarovski crystals. Last is the very unusual trillion (triangle) cut amethyst and Swarovski crystal piece. It measures 16 ¾ inches long and is truly a stunning piece.*

*Description of additional items below...The first is another unusual cut, this hexagon cut amethyst and Swarovski crystal necklace is one that you may not see anywhere else. It is 17 inches long. The second necklace is a beautiful aqua blue quartz with a Swiss blue topaz center stone, it is 18 inches long. The third is a amethyst nugget with citrine crystal briolettes. This measures 15 ¾ - 16 ¼ inches long. The last is another Beautiful green quartz piece. It measures 17 inches in length and has matching drop earrings. The Swarovski crystals are a perfect match! There are 27 quartz briolettes in this beauty.*
